REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The rejections under 35 U.S.C. §112 are obviated by Applicant's amendment and accordingly WITHDRAWN. With respect to the art-based rejections, Applicants arguments (in light of the amendments made) have been considered and are persuasive. Independent Claim 28 (slightly reworded for purposes of discussion) requires adding an alkaline earth metal compound to a raw material, carbonizing, and then treating with an alkali metal compound and heating/chemically activating to make the activated carbon. US 4,556,547 to Nishino, et al., while teaching the addition of the alkaline earth metal compound to the raw material followed by carbonization and the subsequent addition of an alkali metal compound, does not teach the ultimate activation step. While the "drying and calcining" steps recited at *e.g.* (Nishino 3: 37) could be considered a heating step that would activate the material, the temperatures recited at (Nishino 4: 62 – 5: 3) are lower than those typically recognized in the prior art as needed for activation, making application of Nishino on anticipation or obviousness grounds inappropriate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
